

Yes, it's true, our crew is all family. With Covid19 we now not only work together, we also spend our free time together. A big house with a separate 3-bedroom suite definitely helps. Our ages range from 16 months to 63. Quinn (the youngest) does not work much. It's not all giggles, however we have learned to make it work over the years, and we can't see doing it any other way.

What this arrangement means is we can still work on your deck. We are going to be together one way or the other! With that being said, we need you to help us.

Please respect our need for social distancing with a 6-foot distance. You can watch us do our magic, through the patio door or window. We ask that you communicate with us from a distance, (Phone preferred) then no risk or text NewPort at 604-916-6403.

NewPort has a warehouse full of the supplies we need for this season. If the building supply companies close, we will not be able to work on decks that need rot repair. For most of the decks we recoat, we are good to go. It's great work for us and you will still get the deck you want and need. It gets us out of the house and keeps us busy. Your deck job will help us keep our sanity (side benefit).

We are very cautious when we fill up with gas or purchase material. We keep our distance in the line up! We wash our hands often. We are aware that this limited contact with the general population is when we have to be very aware. As we all do! We do not use take out food or coffee services.

If you want a quote for your deck, we can do that as well. Please keep the required 6-foot distance. We often do quotes on decks without a homeowner home. With the Covid19 pandemic, we will only inspect your deck with social distancing and that means 6 feet. We will email you the written quote and over the phone explain the advantages of NewPort Dry Deck's OmegaDeck system and answer any questions you may have.

We are part of the construction industry and want to acknowledge that there is lack of regulations for our industry for Covid19.

- **To date, there has been no specific directives from governing authorities with regards to construction.**
- **We are communicating regularly with construction insurers and associations to keep up to date.**
- **I'm sure you have noticed that construction sites around the city are open.**
- **As of today, all our jobs sites are operating, and our crews are following COVID - 19 protocol.**

We will follow any mandates as they change. If there is a total lock down, we will abide.

When our family OmegaDecks your deck we must ensure that you keep away from our family (stay in the house and watch from inside) and we will keep our distance from your family as well. We are committed to do our part to stop the spread of COVID19. If you have a concern with our position in these challenging times, please send us your thoughts. We have had many family meetings discussing our business and we believe we would be able to work on your deck and not impact the spread of Covid19.

There would be no contact with anyone outside our family that we would not already have. Our family is committing to do the right thing to protect our customers.

We are all in this together.

Regards
